EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 C.F.R. § 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the specification, amend paragraph [0001] to read:

This patent application is a divisional application of U.S. Patent Application No. 09/977,641, filed October 15, 2001, ~~currently pending~~ now Patent No. 6,751,364, which application is hereby incorporated by reference.

2. The following is an examiner's statement of reasons for allowance: While Tong et al. (US 5,944,598 A) teaches the use of image analysis to determine meat quality and yield, and further teaches segmenting background areas from the carcass, and determining the contours of the meat portions, Tong et al. fails to teach a first classification of pixels as Background, Fat and Lean using Background, Fat and Lean start points defined by classifying the darkest and brightest areas of the image and an area therebetween; determining an actual Lean color by determining an average Lean color from among areas classified as Lean inside a subarea determined about a center of gravity of a determined outside contour; and performing a second adaptive classifying of areas as background, fat and lean based on the actual Lean color, as variously required by each of the independent claims. None of the other prior art teaches or suggests these features, so that the claimed invention is allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Claims 1-11 are allowed.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references to Shiranita et al. each variously teaches the use of image analysis to evaluate meat quality. The references to Cross et al., Shackelford et al. and Wassenberg et al. were all cited in the parent application and are therefore made of record herein.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew Johns whose telephone number is (703) 305-4788.
